

OCCASIONAL PAPERS FROM THE NATIONAL BOTANIC GARDENS

No. 9

CHECK-LIST OF NURSERY CATALOGUES FROM GREAT BRITAIN IN
NATIONAL BOTANIC GARDENS, GLASNEVIN
PUBLISHED 1986.

Ruth Brennan

This check-list of the 300 or so British (excluding Northern Ireland) nurseries represented in the international collection of nursery catalogues of the National Botanic Gardens, Glasnevin, dating from 1813 to the present, was prepared in the first instance for in-house use only. Northern Ireland material has been incorporated in the Irish collection, which has been catalogued fully perhaps for future publication but is at present held in card catalogue form at the National Botanic Gardens. In addition, articles relating to the Irish collection such as indexes of the holdings of individual nurseries or of locations of specific plants have appeared in various books and journals (see below).

When undertaking this project it was evident that a choice would have to be made between carrying out the work in accordance with professional cataloguing standards likely to be a slow procedure or settling for a simplified version to be completed more quickly. Due to the volume of material involved approximately 700 titles the latter course was decided upon and what is presented here is a list which includes the name and address of each nursery, followed by the title of each item as stated by the nursery and finally the relevant dates of the individual items.

This arrangement may result in the separation of similar items bearing different titles which ideally should be amalgamated under a so-called 'uniform title', but at least the items can be easily identified. Clearly nursery men did not feel the need for consistency in naming their catalogues; they were not intended for retention and customers were frequently admonished to discard all previous catalogues when a new one was received. This idea that only the current issue is of value still persists even in botanic gardens and research institutes but is a short-sighted one as the scientific and historical value of each issue should be recognised.

In spite of its shortcomings, it is hoped that this check list will prove to be a useful tool for its users.

EXPLANATION OF DATING

n.d. = no date

1960-66 = issues from 1960 to 1966

1960/61 = 1 issue for part or all 1960 and 1961

[1933] = date not on cover or title-page but found elsewhere in issue

[1960?] = probable year of issue

[ca. 1960] = approximate date of issue

[197-] = decade certain

[197- ?] = probable decade

An asterisk * indicates that the catalogue has been photocopied from the original
